

## PLASTIC CARD GENERAL GUIDELINES

- For assistance call our team on 02 6555 4001 or email [info@lanyardsfactory.com.au](mailto:info@lanyardsfactory.com.au).
- This file is simply an assistance file and our designers fully check all files for errors prior to final production.
- If you are experienced in print design then we also accept 85 x 54mm files, one up with 2mm bleed and trim marks set to display.
- Cards are full colour thermal print. Photographic images and gradients are OKAY. We recommend avoiding large amounts of solid dark colours when possible.
- For cards with second side print simply copy the chosen style (with or without hole) and design both sides on the same sheet below.
- When possible avoid text below 9pt (or 8mm height). Some very fine print may not be legible in the final print version of your cards.

Without hole

With lanyard slot

-  Pink line indicates final cut
-  Green line indicates bleed
